### Overview and Pricing:

In addition to our many standard designs, we also offer custom designs (at no additional cost).

Headstones come in a huge variety of shapes and sizes - the only limitation is the actual plot dimension (usually 1220mm wide x 300mm deep x 1050mm high in a metro cemetery and similar in the country. As there is such a variance in the type and amount of granite used in each headstone, price varies accordingly.

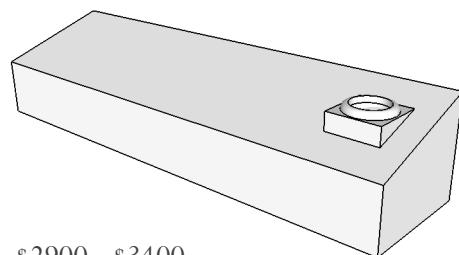

Pricing for headstones will usually be between \$3,300 - \$4,700 - including everything (GST, inscription, installation, cemetery fees) - there is nothing more to pay.

As a guide, just a few headstones are shown on this page along with their indicative finished price range - this range covers granites from light grey to emerald pearl - the only is accessories (such as photographs) which are a small component of the overall price - around \$100.

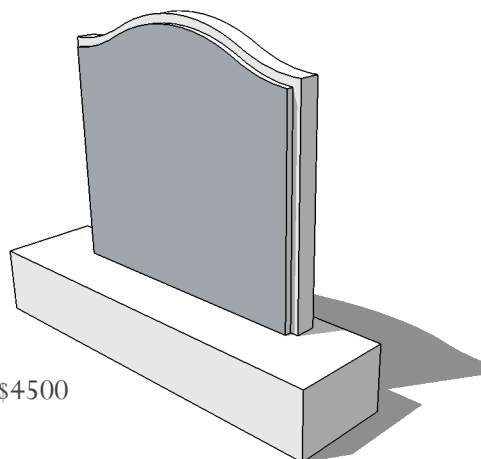

Please contact us on 1800 027 377 for an exact price based on your requirements.

The price range covers granites from G633 Light Grey (one of the less costly granites), through to Emerald Pearl, one of the most expensive granites.

Charcoal/noble grey, or paradiso are two very popular granites - these are mid-rang in terms of price.

All granites are the same quality and will last a life-time (they have all been in the ground turning into stone for millions of years!)
